Dear Ted, 11/12/82

Hope you back is easing off and you are up and around again.

I do have an Akai 7 1/2"/ machine that plays 1 7/8. 3 3/4 and 7 1/2, with 1/4 and 2/3 tranckings.

I can't image the tape you have in mind but if you say I'll enjoy it, why not enjoy?

On the CIA's backlog, as a practical matter I think it is better to wait and not insult them because if you do, they can make you wait longer. Or go to court, which I doubt you are in a position to do.

I'll be interested in seeing anything they may have because they are not supposed to engage in any domestic activity. My guess is that it will include the California affair of several years ago.

Best regards,
